HOW TO USE THE DIRECTORY

The Q-Link Public Domain Software Directory makes downloading quicker and easier by allowing you to browse through the libraries off-line.

This Directory is the Spring, 1987 update and includes all public domain files made live since Nov. 20, 1986. A Directory of all files in the public domain libraries before Nov. 20, 1986 is available in the "Q-Link Store" in THE MALL.

By popular demand, we have also included in this Directory all of the files in the GEOS, New Product Information, Ahoy! and Comal Libraries.

Information on each file includes its subject heading (in bold), the filename, the name of the person who uploaded the file, and the date the file was uploaded. Each chapter corresponds to a different Q-Link library. The chapter is then broken down into the same categories as the online libraries. The files are listed under each category in alphabetical order by subject heading.

For example, if you are looking for an arcade game, check the Table of Contents for the GAME ROOM. Under that chapter, you will find a category called ARCADE. Under ARCADE, you will find additional subdivisions such as "Shoot 'em Up" and "Strategy." If you go to the page number listed next to "Strategy," for example, you will find all of the Strategy game files in alphabetical order. Scan down through the page until you find a subject heading that interests you.

When you find a file you want to download, sign on to Q-Link, go to "Software Libraries" in the COMMODORE SOFTWARE SHOWCASE and select "Download a Specific File." You will be able to read some basic information about the file (download time, other files needed, etc.) and then download the file directly. For more on downloading, see page 3.

If you want the complete description on a file listed in the Directory, go to the "Software Libraries" on Q-Link, select "Browse the Libraries" and the appropriate library and category. Next, select "List by Filename." You will see a menu with ranges of dates. The date on the file in the Directory will tell you which option on the "Date" menu to choose. When you find the filename on the menu, move the check mark next to it and press F1. The description for the file will appear.

HOW TO UPLOAD A FILE

If you have a software gem that you would like to share with other Q-Link members, you can upload it to the Q-Link Public Domain Software Library...FREE!

Here's how you do it:

Once signed on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE and select "Software Libraries." On the Software Libraries menu, select "Upload a File." You will then see the eight software libraries.

Decide in which library your program belongs. (The introduction to each chapter in this Directory contains helpful information about the libraries.) Next, choose the appropriate software category within the library.

On the next menu you see, select "Submit a new file for this area." Q-Link will ask you for the name of the file you wish to upload. This filename must be the exact name of the file on your floppy disk. Type in the filename and press RETURN.

You will then get a screen on which you can type in a description of the file you are uploading. Your description should state that the file is in the Public Domain and a meaningful explanation of the file, for example:

"THIS IS THE DOCUMENTATION FILE FOR... "
"THIS IS THE SECOND OF 4 FILES... "
"THIS IS A DISK UTILITY PROGRAM THAT GIVES YOU THE OPTION OF PRINTING TO THE SCREEN OR PRINTER...."

After you are finished typing the program description, press F7 and select "Send your message to Q-Link." At this point, make sure you have inserted the disk that contains the file you wish to upload. Q-Link will search your disk for the file and then begin uploading.

The file you upload WILL NOT appear in the Software Library immediately. It will be made available to the public by the SysOp of the particular library within a few days.

HOW TO DOWNLOAD A FILE

To download a file (transfer from our computer to yours), sign on to Q-Link, go to the COMMODORE SOFTWARE SHOWCASE and select "Software Libraries." Make sure you have a formatted disk handy. (See page 4 for more on Formatting).

DOWNLOAD A SPECIFIC FILE

By using the Software Directory to locate files you are interested in, you can quickly download them from Q-Link.

When you find a file in the Directory that you want to download, select "Download a Specific File" from the Software Libraries menu and then select "Download A File." Q-Link will ask you to type in the FILENAME and press RETURN. Then type in the name of the UPLOADER and press RETURN.

Q-Link will check to make sure the file is available and then ask you to insert a formatted disk to receive the file. When you are ready, press RETURN and the file will be downloaded. A bell will ring on your Commodore telling you when the download is complete.

BROWSE THE LIBRARIES

If you don't have a specific title in mind, or if you want to find out more information about a file you have selected from the Directory, select "Browse the Libraries" from the Software Libraries menu.

Choose the library you are interested in and then select the appropriate software category. You can then choose to see the files by FILENAME or by SUBJECT HEADING. The filename is the name that the uploader gave to the file. The subject heading more clearly defines what the software does.

Either choice will give you a menu of dates. The dates correspond to when files were uploaded. Move the checkmark to the appropriate date and press F1. You will then see a menu of filenames. To read about a file, move the checkmark to the filename and press F1. The description will be displayed on your screen.

If you wish to download the file, press F7. A menu will be displayed giving you the options to read or post comments about the program, get documentation on the program (if available), or download the program. To download the program, just select "Download This File." Q-Link will then automatically download the file.

HOW TO FORMAT DISKS

Formatting allows you to save files on a new disk. Here's how to format a disk:

1. Turn on your drive, monitor and computer. If you own a 128, hold down the Commodore key so you can boot up in 64 mode.
2. Place the blank disk you wish to format in the drive and close the drive door.
3. Type in: OPEN15,8,15,"N0:diskname,id":CLOSE15 (Press RETURN).

The "diskname" is any name you wish to use up to 16 characters. The "id" is any two characters (the drive uses the "id" to identify the disk). An example of a diskname and id is "GAMES 1,G1."

You will "lose" the flashing cursor while the drive is formatting the disk, until it reaches and executes the CLOSE command. A flashing light on the drive unit means an error has occurred.

Remember that formatting a disk will erase all existing files on a disk and that you only need to format a disk the first time you use it.

Once your disk is formatted, you will be able to download files from Q-Link.
